

Warranty Statement

This document covers all indoor portable dance floors

Page 1 of 1

The following portable dance floors manufactured by Portable Floormaker in the UK are wholly designed and built for indoor use only:

Florlok®, Publok®, Wedlok®, Nightlok® and Starlok®

Should these floors be used/stored in any outdoor setting whether on grass/concrete or other such substrates the warranty covering manufacture and materials particularly resulting in warping of panels and/or electrical failures with the Starlok® product, will be null and void.

The use of these floors in a marquee, tent or stretch tent environment is only recommended if the following precautions are followed although Portable Floormaker will not accept any liability for damage or warping of the panels if laid in this environment:

Only lay the floor on a boarded marquee floor, not on grass or concrete or other such substrate:

- Ensure the marquee floor is not wet/damp
- Lay the floor onto a carpet on top of the marquee boarded floor
- Ensure there is enough air circulation under the marquee floor
- Only leave the floor down for as short a time as possible
- Do not leave the floor laid overnight
- Ensure the underside of the floor is cleaned and dried when recovery of the floor being undertaken
- Ensure the panels are stored in the correct Portable Floormaker storage trolleys when not in use.

If Starlok® is laid in a marquee/tent environment which is not recommended, ensure all electrical plus and sockets are not exposed to damp/moisture and always use a voltage surge protector when connecting the controller to the power outlet.

Should you require any further information please do not hesitate to contact Portable Floormaker.
