

Portable Modular Stage

Stagelok® is a portable modular staging system with the ability to achieve various set up profiles from the 9m² of staging that is stored on the purpose designed storage trolley without the requirement for any screws or tools. Set up is quick and easy and can be carried out by just one person although two people are recommended.

The neatly designed, folding square frame is strong and robust but folds flat for easy storage and handling. Manufactured using black powder coated 25mm mild steel box section, the frames are locked together using frame locks to prevent movement.

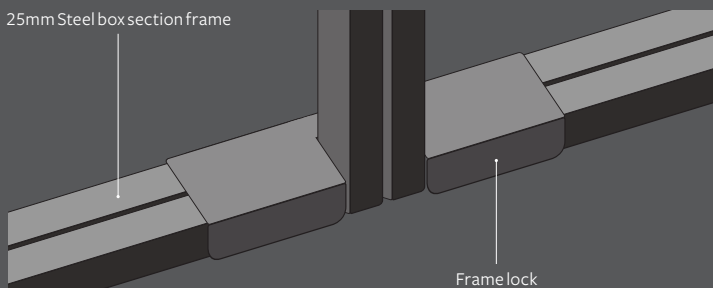

Stagelok® decks are constructed from 18mm plywood, painted black with locating blocks and securing locks to prevent any movement.

Stagelok® frames are available at heights of 30cm, 45cm and 60cm and optional extras include guardrails, steps and drapes.

Stagelok® is ideal for hotels, restaurants, caterers, Event Management Companies, trade shows, weddings, schools and festivals.

Portable Modular Stage

Features – Benefits

- No screws or tools – quick and easy set up
- Painted plywood deck – helps against moisture/damp ingress
- Locating lugs and securing locks – lock down the deck
- Wipe clean powder coated frame – low maintenance
- Durable staging system – good value for Return of Investment (ROI)
- 3 year warranty on manufacture, labour and materials (excluding plywood deck) – peace of mind
- Slim line trolley – fits through single/double width doorways dependent upon frame size
- One trolley stores and transports up to 9m² of staging – compact/space saving
- Range of accessories available include steps, guardrails, skirting – complete solution
- Fully powder coated trolleys – offers a harder, more durable finish

Specifications
